

Introduction to : Layout types

Feb 2026
W Kruger

Volume-variety layout classification

4 Major Layout Types (Ch3&6)

1. Assembly Line / Product centred layout
2. Project layout / Fixed position layout
3. Work Centre / Job Shop / Process centred layout
4. Cellular / Product family / Group layout

Assembly Line / Product centred layout/Production line product layout

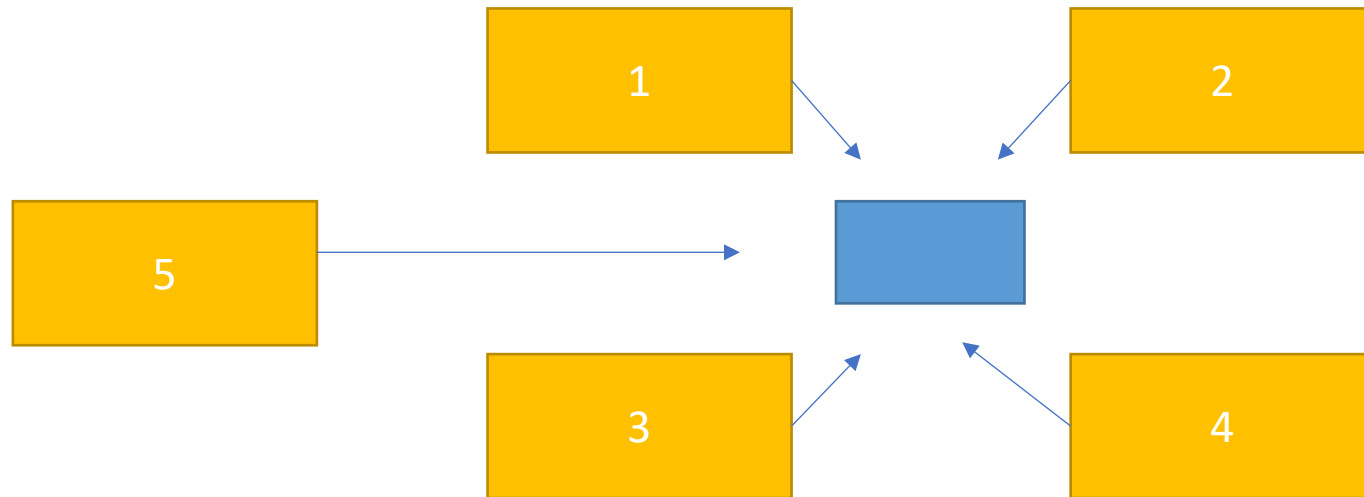

Based on the process sequence of parts being produced

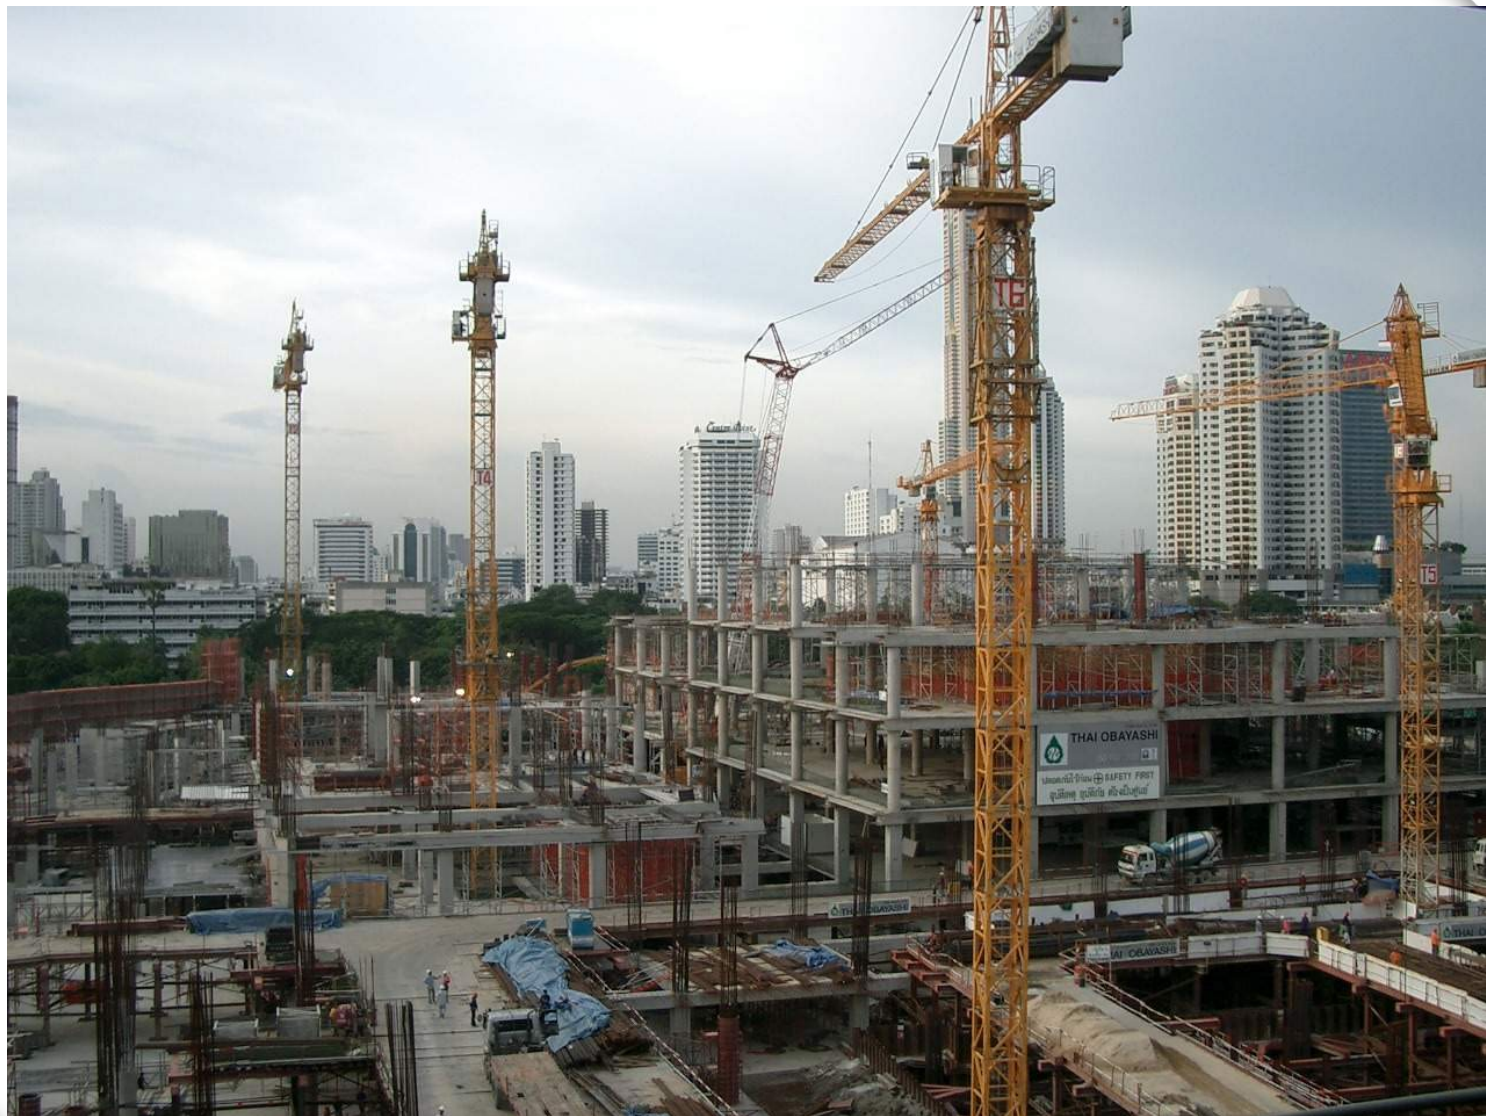

Material flows from one station to the next
at certain rate

Project / Fixed position Layout/Fixed Product Layout

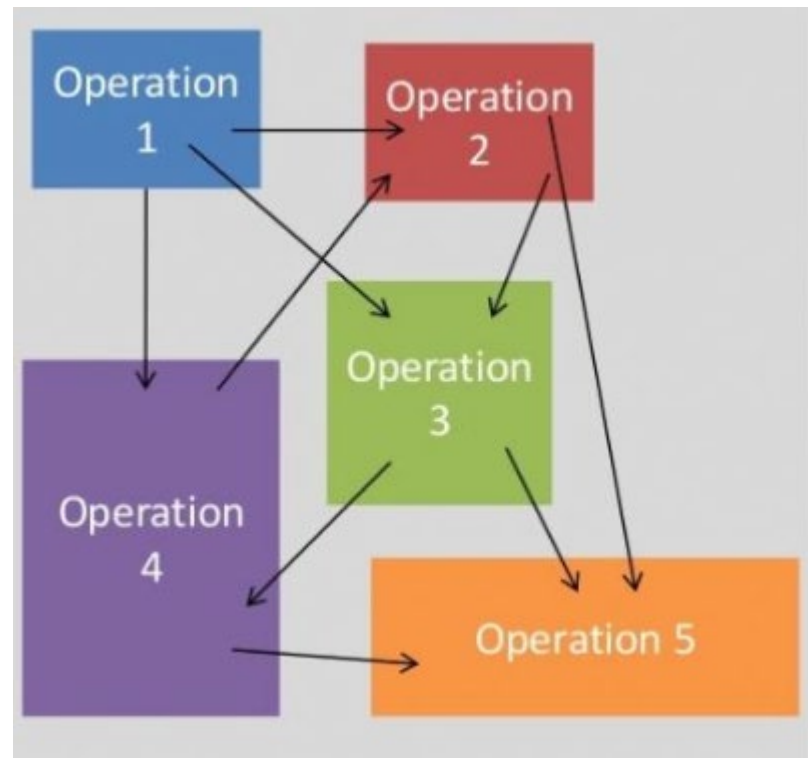

Workstations brought to the material/product

Work Centre / Job Shop / Process centred Layout

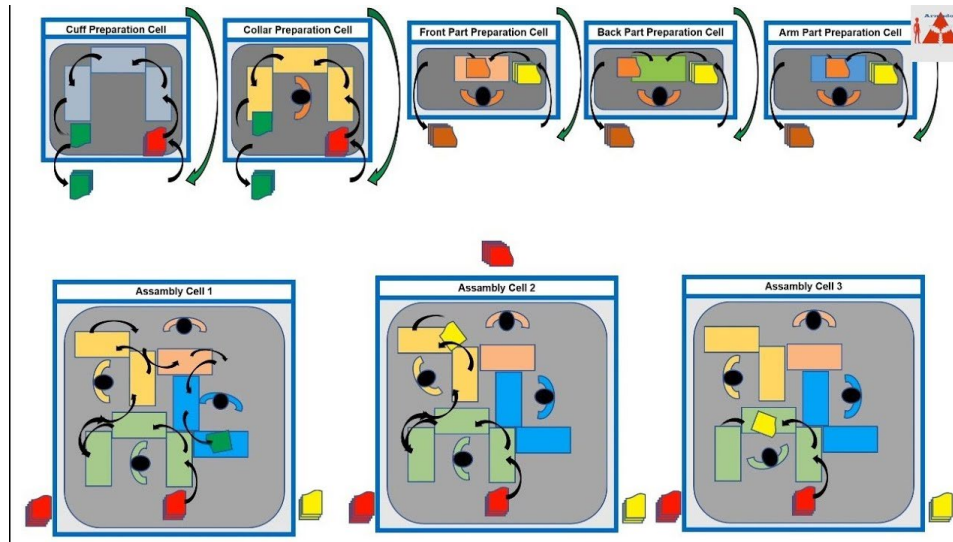

Similar functions/equipment/processes grouped together

Cellular layout/Product family layout

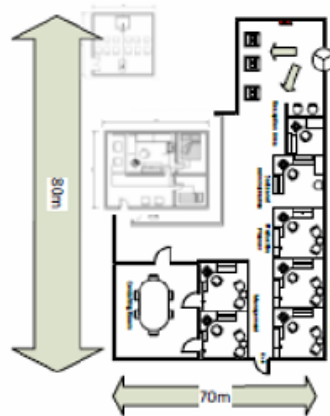

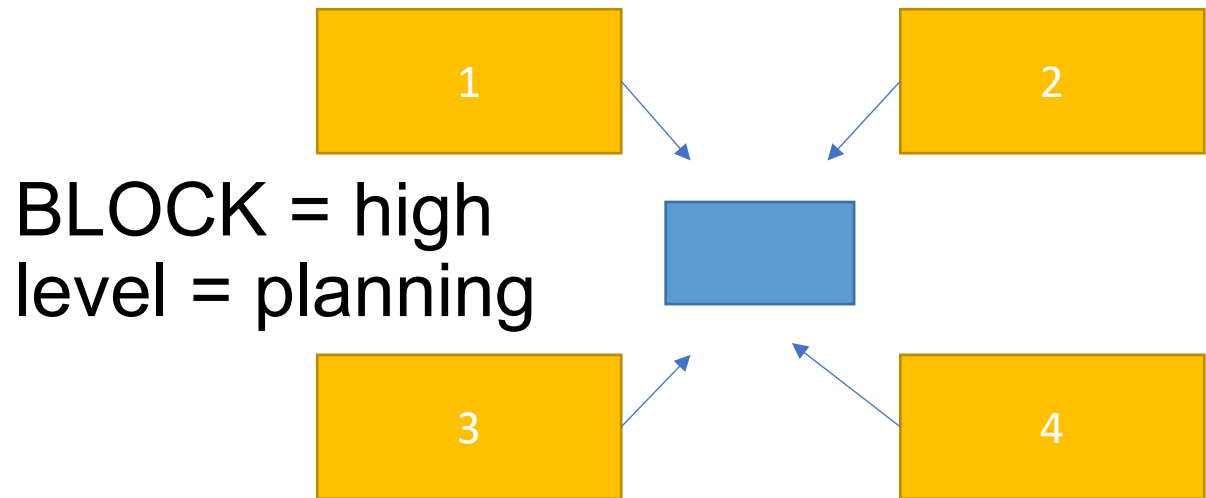

- Group products according to common characteristics
- Product family treated as a pseudo-product
- Processing equipment placed in a manufacturing cell

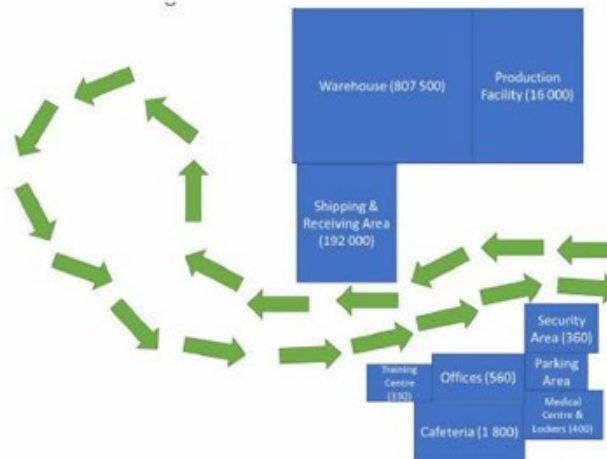

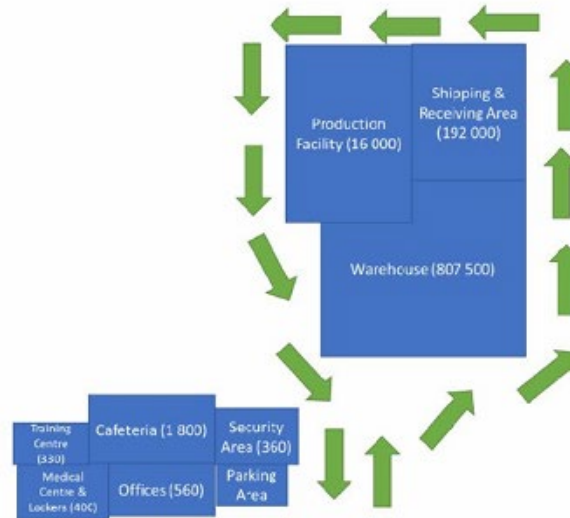

Block vs Detail design layout (Ch6)

Use
Depends
on goal

DETAIL = micro
level = detail design

Block layouts (Ch6 FP or Ch8 OM)

Detail layouts (Ch6 FP or Ch8 OM)
